Inphi® Corporation Wins Fabless Semiconductor Association's (FSA) “Most Respected Private Fabless Company” Award

*Award for product achievements and future potential marks second consecutive year
Inphi is recognized by FSA.*

Westlake Village, Calif., December 10, 2007 – Inphi® Corporation today announced it has won the Fabless Semiconductor Association's (FSA) award for the industry's "Most Respected Private Fabless Company." Members of the semiconductor industry cited Inphi's significant achievements in products, its vision, and the company's considerable future opportunities in the semiconductor industry in casting their votes. The FSA, recently rebranded as The Global Semiconductor Alliance (GSA), is the leading semiconductor association and the voice of the global fabless business model.

“We are pleased to recognize Inphi with this honor and look forward to the company's future success in the timing, instrumentation, optical and microwave communication markets,” said Jodi Shelton, co-founder and executive director of the GSA.

“Once again, Inphi has been honored by our peers for our commitment to innovation and technical excellence in delivering high-performance solutions for our customers throughout the industry,” said Young Sohn, CEO, Inphi Corporation. “This award is a tribute to the exceptionally talented professionals at Inphi, their uncompromising commitment to deliver for our customers, and the strength of our relationships with our customers, partners, and investors.”

About The Global Semiconductor Alliance

The GSA, formerly the FSA, works to accelerate the growth and increase the return on invested capital of the global semiconductor industry by fostering a more effective fabless ecosystem through collaboration, integration and innovation. It addresses the challenges within the supply chain including IP, EDA/design, wafer manufacturing, test and packaging to enable industry-wide solutions. Providing a platform for meaningful global collaboration, the Alliance identifies and articulates market opportunities, encourages and supports entrepreneurship, and provides members with comprehensive and unique market intelligence. Members include companies throughout the supply chain representing 25 countries across the globe. www.gsaglobal.org.

About Inphi Corporation

Inphi Corporation designs and develops integrated circuits that consistently deliver the industry's highest performance and best signal integrity for processing high-speed digital data in computing and communications systems. The company is a leading supplier of memory interface logic, optical components and high-speed logic which deliver the world's highest performance as measured by signal integrity. Leading corporations rely on Inphi for components that transport, store, deliver, and test high-speed data for the world's most innovative high-performance communications and computing systems. Inphi is recognized as a global technology leader for its innovative designs, dedication to the development of open standards, and excellence in R&D.
