Inphi® Corporation Wins FSA Award For “Outstanding Financial Performance By A Private Fabless Company”

Judges believe Inphi exemplifies excellence in the fabless semiconductor industry.

Westlake Village, Calif., December 11, 2006 – Inphi® Corporation today announced it has won the FSA award for “Outstanding Financial Performance by a Private Fabless Company.” FSA, the voice of the global fabless business model, made the announcement at its twelfth annual FSA Awards Dinner this month in Santa Clara, Calif.

“We congratulate Inphi for reaching the financial milestones required to be recognized for the Outstanding Financial Performance by a Private Fabless Company Award,” said Jodi Shelton, co-founder and executive director of FSA. “We are delighted to highlight the company’s financial success with this award.”

The Outstanding Financial Performance by a Private Fabless Company award recognizes private companies that doubled either revenue or net income with no negative quarters over the eight consecutive quarters ending June 2006.

“We are honored to receive this award from the FSA recognizing Inphi Corporation’s financial performance,” said Bill Forster, vice president of operations at Inphi Corporation. “The widespread adoption of our innovative, high-performance solutions by our customers, the hard work of our team, and the continued support from our partners and investors all contributed to the solid revenue growth leading to this award.”

About FSA:

FSA is the voice of the global fabless business model. Incorporated in 1994, FSA positively impacts the growth and return on invested capital of this business model to enhance the environment for innovation. It provides a platform for meaningful global collaboration between fabless companies and their partners; identifies and articulates opportunities and challenges to enable solutions; and provides research, resources, publications and survey information. Members include fabless companies and their supply chain and service partners, representing more than 21 countries across the globe. www.fsa.org.

About Inphi Corporation

Founded in November 2000, Inphi Corporation is a privately held electronic components company based in Westlake Village, California. Inphi delivers high-speed precision integrated circuits that optimize power, performance, and size, enabling customers to build the highest performance, most cost-competitive telecommunications, data communications, and instrumentation systems. Capitalizing on its heritage and leadership in delivering proprietary solutions for the most demanding timing applications such as Instrumentation and Telecom, Inphi debuted its ExacTik™ family of CMOS precision timing devices for computing applications in 2004. These devices, ideal for memory clocking, and other server, workstation and notebook applications, deliver the highest performance in terms jitter, slew rates, clock times and skew. Additional information about the company can be found at www.inphi-corp.com.
