Industry Veteran Young K. Sohn Named Inphi Corporation CEO

An accomplished growth specialist, Mr. Sohn brings an infusion of operating and technical management expertise as well as a profound knowledge of the Asian IC market.

WESTLAKE VILLAGE, CALIF., July 24, 2007 – Inphi® Corporation today announced that industry veteran Young K. Sohn has been named CEO. Mr. Sohn will lend his expertise to drive Inphi's strategic direction and growth to deliver the industry's broadest and highest performing portfolio of integrated circuits for processing high-speed data.

“Young's 25 years of experience in growing technology businesses through operational and technical excellence will be invaluable in leading Inphi across its next threshold of aggressive growth,” said Dado Banatao, Chairman of the Board of Inphi Corporation. “Young's intimate knowledge of the Asian market will be a tremendous asset as Inphi Corporation continues to be a dominant vendor of high performance ICs in the region.”

A highly accomplished businessman, Mr. Sohn earned a reputation for his expertise in leading public and private high technology companies through successful growth by driving excellence across operations. Most recently, he was president of Agilent Technologies' Semiconductor Group (now known as Avago Technologies) where he led the successful turnaround of the semiconductor operation. Prior to that time he served as chairman and CEO of Oak Technology, a digital media semiconductor company providing solutions for the consumer electronics markets. Mr. Sohn also worked as co-president of Quantum Corporation, a data storage solution products manufacturer.

2-2-2

Mr. Sohn honed his knowledge of the Asian market as he founded and built Intel's Korea business and managed the Samsung-Intel strategic partnership. While with Intel, he started the company's PC chipset business unit, which grew to over \$300M in revenue under his leadership.

An active investor and advisor, Mr. Sohn invested in or served on the board of directors of more than 25 companies over the last 15 years including PLX Technology, Inc., Tivo, Inc., iPlanet, Synnex Corp., Hynix. He currently is a board member for ARM Holding PLC, and Cymer, Inc.

Mr. Sohn earned a bachelor's of science in electrical engineering from the University of Pennsylvania and a master's of science from the MIT Sloan School of Management.

About Inphi Corporation

Inphi Corporation designs and develops integrated circuits that consistently deliver the industry's highest performance and best signal integrity for processing high-speed digital data in computing and communications systems. The company is rapidly becoming the number one supplier of timing devices and PMD for optical communications delivering the world's highest performing components. Leading corporations rely on Inphi for components that transport, store, deliver, and test high-speed data for the world's most innovative high-performance communications and computing systems. Inphi is recognized as a global technology leader for its innovative designs, dedication to the development of open standards, and excellence in R&D. Additional information about the company can be found at www.inphi-corp.com.
