Inphi To Grow Westlake Village-based Operations by Nearly 60% in 2007; Launches Recruiting Initiative

WESTLAKE VILLAGE, CALIF., January 23, 2007 – Citing strong growth and increasing demand for its high-performance components, Inphi® Corporation today announced a hiring initiative designed to fill over 30 engineering, marketing, sales, and administrative positions in its Westlake Village offices during 2007—a nearly 60% growth rate. Inphi has earned a reputation as a technology leader in the design and manufacture of devices that perform critical functions in consumer electronics, communications, and computing platforms.

“As Inphi continues to experience robust, year-on-year growth the need to expand and strengthen our infrastructure becomes a critical success factor,” said Tim Semones, chief financial officer for Inphi Corporation. “This proactive initiative will ensure we are fully prepared to meet our customers’ needs in all aspects of our business.”

Inphi's work environment blends entrepreneurial spirit and energy with teamwork and innovation. Through this initiative, the company hopes to attract experienced individuals who can tackle challenging problems and develop innovative, customer-oriented solutions.
